mukizalissette@gmail.com | github.com/lisette-lachiever | mukiza.tech

SUMMARY

Software Engineering student and Mastercard Foundation Scholar with hands-on experience building full-stack and backend applications using Python, Flask, and SQL. Skilled in designing REST APIs, relational database schemas, and responsive web interfaces, and in applying object-oriented programming, data structures, and Agile practices to deliver real-world software. Brings startup product-development experience building web platforms and internal systems from the ground up, with a strong record of turning organizational needs into working digital solutions. Driven by clean software design and problem-solving, with a keen interest in AI and EdTech, and eager to contribute my engineering skills to a dynamic team.

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, C++, JavaScript, SQL, HTML5, CSS3
- **Frameworks & Libraries:** Flask, Jinja2, Chart.js, Leaflet, FastAPI
- **Databases:** MySQL, SQLite
- **Developer Tools:** Git, GitHub, VS Code, Linux
- **Software Engineering:** REST APIs, Object-Oriented Programming, Data Structures & Algorithms, Database Design, Responsive / Mobile-First Web Development, Agile / Scrum, Version Control, Debugging & Testing
- **Design & Productivity:** Figma, Canva, Google Workspace

PROFESSIONAL EXPERIENCE

Extern in the Monitoring, Evaluation, Research & Learning (MERL) department

Jul 2026 - Aug 2026

Teach for Kenya, Nairobi, Kenya

- Engineering a data reporting system for the MERL department to automate the collection, aggregation, and presentation of programme monitoring and evaluation data.
- Designing the database structure and backend logic that transform raw programme data into structured, decision-ready reports.
- Collaborating with the MERL team to translate reporting requirements into technical specifications and an iteratively delivered working system.
- Applying Agile development practices to build features that improve data accuracy, reduce manual reporting effort, and strengthen programme insight.

Technology & Learning Systems Lead

Present

[DASA Africa](#) (Early-Stage Startup)

- Built and deployed the organization's official website, establishing DASA Africa's digital presence ahead of its pilot launch.
- Leading the design and implementation of technology systems that support learning programmes, translating organizational needs into digital solutions.
- Collaborating with the founding team to build the startup from the ground up, contributing to product planning and technology strategy in a fast-paced environment where technical decisions directly shape the product.
- Driving iterative improvements to user experience and identifying digital tools that increase operational efficiency and support the startup's digital infrastructure.

Front-End Web Developer Intern

August 2024 - Dec 2024

Web Design Rwanda Ltd, Kigali, Rwanda

- Developed and deployed a fully responsive website for Infinity Hotel Rwanda featuring service listings, booking details, and contact forms, strengthening the hotel's digital presence and guest engagement.
- Engineered mobile-first front-end interfaces with HTML5, CSS3, and JavaScript, delivering pixel-accurate, performance-optimized pages aligned with client brand standards across devices.
- Collaborated directly with the hotel management team, presenting prototypes, integrating feedback, and iterating rapidly to deliver a client-approved product.

Matriculation Intern

Oct 2025

African Leadership College of Higher Education, Beau Plan, Mauritius

- Supported student registration operations through data entry, document verification, and records coordination with the Registrar's Office, ensuring accurate data and a smooth onboarding experience for new students.

Sales Assistant

Nov 2024 - Feb 2025

Musengimana's Papeterie, Kigali, Rwanda

- Delivered customer support, managed sales transactions, and organized stock for stationery and printing services in a fast-paced retail environment.

PROJECTS

KCBlendz E-Commerce Platform: Python, Flask, SQLite, Jinja2, HTML, CSS, JavaScript

- Built a full-stack e-commerce platform for a beauty business using Python and Flask, following software engineering best practices with Git version control.
- Designed the relational database schema in SQLite to model products, users, and customer orders.
- Implemented secure user authentication and account management functionality.
- Developed product catalog and shopping cart features, and managed end-to-end customer order workflows.
- Integrated backend logic with responsive Jinja2, HTML, CSS, and JavaScript templates to deliver a seamless user experience.

URBEX, NYC Taxi Data Dashboard: Python, Flask, MySQL, JavaScript, Chart.js, Leaflet

- Engineered a full-stack analytics dashboard that processes over **1.4M NYC taxi records** into interactive visual insights.
- Built a data pipeline to clean, sort, and prepare raw records before storing them in a MySQL database.
- Implemented core algorithms for distance calculation and sorting from scratch without external libraries, applying data structures and algorithms knowledge.
- Developed REST APIs with Flask and connected them to the MySQL backend to serve processed data.
- Created interactive charts and map visualizations using JavaScript, Chart.js, and Leaflet for data exploration.

MoMo Transaction Analytics Dashboard (In Progress) Python, MySQL, REST APIs

- Building a backend system that parses and processes **mobile money SMS/XML data** into structured financial insights.
- Engineered XML parsing and data-cleaning logic to categorize and group transactions by type.
- Designed the MySQL database schema and implemented REST API endpoints in Python with authentication.
- Developing a dashboard to visualize transaction trends using interactive charts.

Portfolio & source code: mukiza.tech | github.com/lisette-lachiever, live web applications, coursework projects, and version-controlled builds across Python and HTML/CSS/JS.

EDUCATION

African Leadership College of Higher Education, Beau Plan, Mauritius

Feb 2025 - Present

Bachelor of Science in Software Engineering

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming (Java / C++ / Python), Web Development, Database Systems, Software Engineering Principles, Computer Networks

LEADERSHIP & ACTIVITIES

Head, Academic Affairs Committee, Student Representative Council, ALCHE

Jun 2025 - July 2026

- Led a team of 3 to champion the academic needs of 43+ students in faculty and departmental meetings; proposed curriculum improvements that strengthened student-centred learning and student representation in institutional decision-making.

Student Co-Organiser, TEDxALCHE

Nov 2025 - Present

- Co-organising the inaugural TEDxALCHE event taking place on October 05th, coordinating speakers, logistics, and marketing across a multidisciplinary team to deliver an independently organised, TED-licensed event amplifying student voices.

Scholar, Mastercard Foundation Scholars Program

Feb 2025 - Present

- Competitively selected based on academic excellence, leadership potential, and commitment to positive impact; engaged in scholarly programming covering ethical leadership, entrepreneurship, and community development.

LANGUAGES & INTERESTS

- Languages:** Kinyarwanda (Native), English (Fluent)
- Interests:** EdTech & Innovation, AI & Robotics, Community Service
